## @Design Audit Report – CareerFrame Landing Page

# Section-by-Section Audit

#### 1. Hero Section

UI Element	Observation
Logo	The logo lacks visual clarity and is improperly scaled. It appears unclear and doesn't follow a balanced visual hierarchy.
Navigation	Typography size is too small. Navigation items appear to have hover states applied even when idle. Inconsistent color usage disrupts brand consistency.
Header Drop Shadow	The drop shadow under the header adds unnecessary visual noise and lacks a clear functional purpose.
Headline	The headline is unclear and lacks impact. Typeface is small, and brand colors are not applied correctly.
Negative Space	Margins and padding are inconsistent across left/right edges and between nested elements, leading to a cluttered layout.
Nested Elements (Countdown, Access Spots, CTA)	Three different UI elements are placed in close proximity without visual hierarchy. Typeface, iconography, and color usage are inconsistent and lack cohesion.

**CTA Button** 

The button color is excessively bright, text contrast is poor, and the

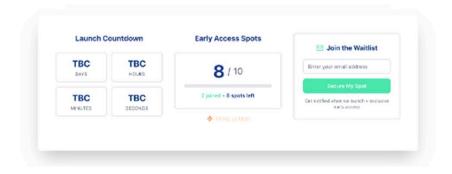

design does not align with the brand palette.

**Mobile Responsiveness** 

On mobile, elements appear misaligned and overcrowded. Layout lacks visual breathing space, leading to a poor mobile experience.

# Launch day is soon approaching — we're letting in only 10 people first and you'll want to be one of them!

#### 2. "Find the Right Role, Get There Faster" Section

**UI Element** 

Observation

**Headline** There is no consistency in typography hierarchy. This headline is visually

larger than the hero headline, which breaks the flow. Overuse of Olympian

Blue undermines brand emphasis.

**Subheadline** Typeface is too small and lacks proper line height and spacing.

**Typography Hierarchy** Heading and body text lack clear differentiation. Font sizes and weights are

inconsistent.

Color & Branding Inconsistent application of brand colors across headings, buttons, and

icons

Clarity of Copy The content is not user-centered and includes jargon that may confuse the

target audience.

**Button Visibility** CTA buttons are not visually distinct. The color is overly saturated, making

the text hard to read.

**Spacing & Layout** Whitespace is uneven, and there is visual congestion due to unclear

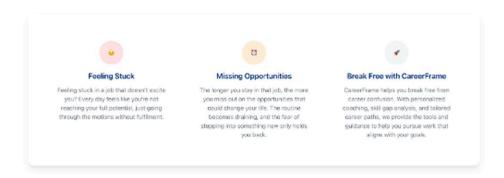

section boundaries.

**Section Clarity** This block visually blends into the next, creating confusion.

Section-in-section appearance with drop shadows and white overlays lacks

definition.

## 3. "What to Expect After You Sign Up" Section

UI Element	Observation
Headline	Typographic scale is reduced here, making the headline appear less important than previous ones. Color consistency issues persist.
Subheadline	Font size remains too small; no clear distinction from body text.
Background Color	Gray background reduces content legibility and draws attention away from key messaging.

**Spacing & Layout** Inconsistent padding and margins disrupt readability.

Visual Clarity Overuse of visuals/icons overwhelms the user. Section feels

crowded and lacks clear hierarchy.

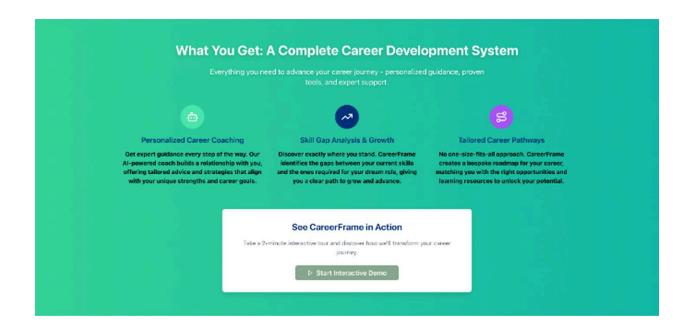

**Separation from Next Section** No clear visual break between adjacent sections, resulting in poor

scannability.

### 4. "What You Get: A Complete Career Development System" Section

UI Element	Observation
Headline	Typographic inconsistency continues. The use of Olympian Blue instead of a neutral heading color limits scannability.
Visual Noise	Green background color feels intrusive. Icon styles and background shapes lack alignment with the rest of the page.
Icons/Visuals	Icon background styles introduce new colors not defined in the brand palette, disrupting visual cohesion.
Spacing & Layout	Poor section spacing and inconsistent margins detract from usability.
Visual Clarity	A video element is introduced without visual separation, making the section overly dense and difficult to interpret.

#### 5. "Powerful Features to Accelerate Your Career" Section

UI Element	Observation
Headline	Scale and color inconsistency continues here. Overuse of bright blue headings throughout the page reduces emphasis.
Card Content	Feature cards are visually overloaded with text and icons, impacting readability and accessibility.
CTA Placement	CTA positioning is inconsistent and lacks hierarchy.
Visual Differentiation	Excessive spacing between cards and minimal separation between sections causes layout dissonance.

#### Powerful Features to Accelerate Your Career

Every tool you need to discover, prepare for, and land your dream career - all powered by intelligent Al guidance.

8

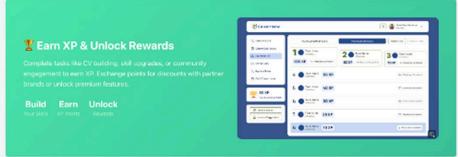

Explore Roles Access (Freemium/Premium) Cet limited or unlimited access to lob fit, salaries, and

a

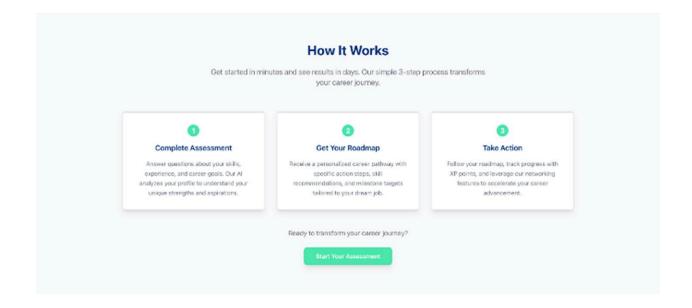

#### 6. "How It Works" Section

UI Element	Observation
Typography	Headline and subheading sizes are small and inconsistent.
Icons/Visuals	Lacks visual consistency and does not align with brand iconography style.
Color	The background gray tone adds unnecessary weight to the section.
Buttons	Buttons are not easily identifiable. Color contrast is poor, and hover/active states are missing or inconsistent.

#### 7. Testimonials Section

UI Element	Observation
Headline & Subheadline	Typographic inconsistencies are noticeable. Heading sizes are misaligned compared to prior sections.
Quote Layout	Quotes are not visually prioritized. Author names and roles are styled more prominently than the testimonials themselves.
Visual Emphasis	Visuals (e.g., profile images or icons) dominate rather than support the content.

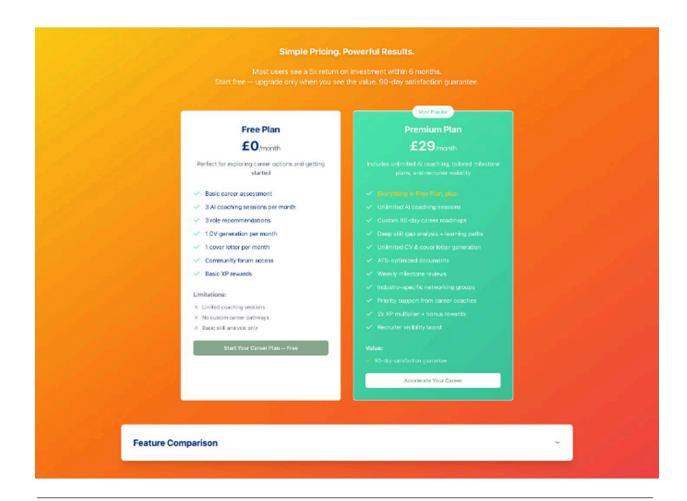

#### Real Stories - Coming Soon

Here's what our early adopters and beta testers are saying about their experience with CareerFrame so far.

#### 8. Pricing plan Section

UI Element	Observation
Headline & Subheadline	Inconsistent typography scale and hierarchy.
Background Design	Gradient background introduces unnecessary complexity and distracts from the pricing cards.
Card Design	Pricing cards are too compact, compromising readability and clarity of features.
Transparency	Important information is not clearly visible due to poor text contrast.
CTA Buttons	Button colors are overly saturated, inconsistent with brand palette, and lack hover feedback.

#### 9. FAQ's Section

#### UI Element Observation

Accordion Design Chevron placed within the heading creates confusion. Adds an unnecessary click

barrier. FAQ items should be scannable by default or designed with better

interaction patterns.

Honest answers to the questions holding you back from taking action

#### 10. Join the waitlist Section

UI Element	Observation
Headline & Subheadline	Typography inconsistencies continue. Font sizes are not optimized for clarity or hierarchy.
Background	Gradient background feels visually heavy and inconsistent with other sections.
Form Design	Input fields are too small and lack proper placeholder guidance.
CTA Button	CTA lacks contrast and visual clarity. The button design deviates from brand guidelines.

#### **11. Footer Section**

UI Element	Observation
Logo	Logo is undersized and lacks visual impact.
Typography	Font sizes are too small for legibility.
Spacing	Negative space is inconsistent, leading to a cluttered appearance.
Navigation Links	Font sizes and alignments vary; accessibility and hierarchy should be improved.

Category	Observation
Color / Branding	Inconsistent application of brand colors across all sections. Unnecessary color variants dilute brand identity.
Font Size & Readability	Headings and body text lack a consistent typographic system. Poor line height and scale further reduce readability.
Alignment & Grids	Layout lacks a structured grid system. Inconsistent padding/margins reduce visual harmony.
Button States	Button hover/focus/active states are not clearly defined, reducing interactivity feedback.
Iconography	Styles vary drastically from section to section, breaking the visual flow.
Accessibility	Low contrast between background and text in several areas impairs accessibility. Form fields and buttons do not meet basic accessibility standards.

# Final Recommendations

- Establish and adhere to a **consistent type scale** (for headings, subheadings, body).
- Define a core color palette and ensure it's used uniformly across all UI elements.
- Improve **spacing and alignment** using a standard grid system.
- Refactor CTA buttons for visual consistency and accessibility.
- Rework mobile responsiveness ensure proper alignment and typography scale across breakpoints.
- Clearly define **section boundaries** and hierarchy to avoid layout ambiguity.
- Maintain visual harmony in icon styles, card layouts, and testimonial formatting.
